BUSINESS RESEARCH METHOD

HYPOTHESIS

Saloni Hajgare - 31582231

Hypothesis

Hypothesis is usually considered as an important mechanism in Research. Hypothesis is a tentative assumption made in order to test its logical or empirical consequences. If we go by the origin of the word, it is derived from the Greek word- 'hypotithenai' meaning 'to put under' or to 'to suppose'. Etymologically hypothesis is made up of two words, "hypo" and "thesis" which means less than or less certain than a thesis. It is a presumptive statement of a proposition or a reasonable guess, based upon the available evidence, which the researcher seeks to prove through his study. A hypothesis will give a plausible explanation that will be tested. A hypothesis may seem contrary to the real situation. It may prove to be correct or incorrect. Hypothesis need to be clear and precise and capable of being tested. It is to be limited in scope and consistent with known or established facts and should be amenable to testing within the stipulated time. It needs to explain what it claims to explain and should have empirical reference

Definition

“A hypothesis can be defined as a tentative explanation of the research problem, a possible outcome of the research, or an educated guess about the research outcome”. Goode and Hatt have defined it as “a proposition which can be put to test to determine its validity”.

“Hypotheses are single tentative guesses, good hunches – assumed for use in devising theory or planning experiments intended to be given a direct experimental test when possible”. According to Lundberg, “A hypothesis is a tentative generalisation, the validity of which remains to be tested. In its most elementary stage, the hypothesis may be any hunch, guess, imaginative idea, which becomes the basis for action or investigation”.

TYPES OF HYPOTHESIS

Simple Hypothesis: It shows a relationship between one dependent variable and a single independent variable. At lower level abstraction are some hypothesis that state the existence of empirical uninformation. **For example – If you eat more vegetables, you will lose weight faster.** Here, eating more vegetables is an independent variable, while losing weight is the dependent variable.

Complex Hypothesis: It shows the relationship between two or more dependent variables and two or more independent variables. **Eating more vegetables and fruits leads to weight loss, glowing skin, reduces the risk of many diseases such as heart disease, high blood pressure and some cancers.**

Directional Hypothesis: It shows how a researcher is intellectual and committed to a particular outcome. The relationship between the variables can also predict its nature. **For example- children aged four years eating proper food over a five-year period are having higher IQ levels than children not having a proper meal. This shows the effect and direction of effect.**

Non-directional Hypothesis: It is used when there is no theory involved. It is a statement that a relationship exists between two variables, without predicting the exact nature (direction) of the relationship.

SOURCES USED IN HYPOTHESIS FORMULATION

❖ **Intuition**

❖ **Personal experience- of area, process, objects**

❖ **Previous researches studies**

❖ **Research abstracts, journals, books, thesis, dissertations etc**

❖ **Theories/ models**

❖ **Consultations**

❖ **Observation**

❖ **Culture**

❖ **Continuity of research**

Marketing Management

Q.1.

What are the pillars of Marketing?

-Ans.

The 4 pillars of marketing are;

- (1) Market Segmentation
- (2) Target Market Segment
- (3) Product Positioning
- (4) Product differentiation.

(1) Market Segmentation:-

Market segmentation is the process of dividing a heterogeneous market into smaller, more homogeneous segments based on certain characteristics or criteria. The purpose of market segmentation is to identify groups of customers who share similar needs, preferences, behaviours or characteristics, allowing businesses to tailor their marketing efforts more effectively.

There are several common bases for market segmentation like demographic, behavioural, psychographic, geographic, B2B etc.

(2) Target Market Segment:-

The target market segment refers to the specific segments within a larger market that a business chooses to focus its marketing efforts on. It represents the group of customers who are most likely to be interested in and purchase the products or services offered by the business. Once the target market is identified, business can tailor their marketing tactics to engage with customers.

(3) Product positioning :-

Product positioning is the process of creating a distinct image or perception of a product or brand in the minds of customers relative to competitors. It involves identifying and communicating the unique attributes, benefits, and value propositions of a product that differentiate it from alternatives in the market. The goal of product positioning is to occupy a distinctive and desirable place in the minds of target customers, effectively influencing their purchasing decisions and preferences.

(4) Product differentiation :-

Product differentiation is the process of distinguishing a product or service from its competitors in the eyes of consumers. It involves highlighting unique features, benefits, attributes, or qualities that set the product apart and make it more appealing to target customers.

There are several ways in which product differentiation can be achieved :-

- a) Unique features or attributes, b) Quality c) Brand image & reputation etc.

Q.2.
Ans.

Explain product life cycle with suitable example.
The product life cycle is a theoretical framework that describes the stages a product goes through from its introduction to its eventual decline in the market. It consists of 4 main stages.

1] Introduction stages-

This is the stage where the product is first introduced to the market. Sales are low, companies often invest heavily in the marketing and promotion to create awareness & stimulate demand.

Eg:- The launch of iPhone in 2007.

2] Growth :-

In the growth stage, the product experiences rapid sales growth as consumer awareness increases and demand rises.

Eg:- when the iPhone gained popularity, more features were added, it entered the growth stage. Sales increased and competition increased.

3] Maturity :-

The maturity stage is characterized by stable sales and market saturation. Companies focus on maintaining market share through product differentiation, pricing strategies and marketing efforts.

Eg:- iPhone reached this stage, sales stabilized. Apple continued to release new versions of iPhone.

with incremental improvements.

4] Decline:-

In the decline stage, sales begin to decline as consumers preferences shift, new technologies emerge, or substitutes enter the market.

Companies may choose to discontinue the product or minimal investments to prolong its life cycle.

Eg:- Eventually at some point of time, iPhone will enter the decline stage as newer technologies emerge and consumer preferences change.

Q.3
Ans.

What do you mean by SWOT Analysis?

SWOT analysis is a strategic planning tool used by businesses to identify and assess internal strengths & weaknesses, as well as external opportunities and threats.

- (1) Strengths :- These are internal factors that give a business an advantage over others. They could include resources such as financial stability, skilled employees, strong brand reputation, or proprietary technology.
- (2) Weakness :- These are internal factors that hinder a business's performance or competitive position. Weaknesses could include lack of capital, outdated technology, poor location or inadequate marketing strategies.
- (3) Opportunities :- These are external factors that could positively impact a business's growth or profitability. Opportunities could arise from market trends, changes in consumer behavior, emerging technologies, or gaps in the competition.
- (4) Threats :- These are external factors that could negatively affect a business's performance or viability. Threats could include

competitive rivalry, economic downturns, regulatory changes, shifts in consumer preferences, and technological disruptions.

By analyzing these four aspects, businesses can develop strategies to leverage their strengths, address weaknesses, capitalize on opportunities, and mitigate threats.

SWOT analysis help businesses make informed decisions & develop action plans that align with their objectives & market conditions

Q.4.
Ans.

What are the needs and importance of marketing?

① Understanding customer needs :-

Marketing helps businesses identify and understand the needs, wants and preferences of their target customers, enabling them to develop products & services that meet those needs effectively.

② Creating values :-

Marketing communicates the value proposition of a product or service to customers highlighting its benefits and differential from competitors. This helps create perceived value in the minds of consumers.

③ Building Brand Awareness :-

Marketing efforts such as advertising, promotion, branding activities help build brand awareness & recognition, which are crucial for attracting & retaining customers.

④ Generating Revenue :-

Marketing plays a vital role in driving sales and revenue. By attracting customers, generating leads and converting them into paying customers through sales and promotional strategies.

5) Market Expansion :-

Marketing expansion facilitates market expansion by identifying new market segments, exploring untapped opportunities & developing strategies to enter new markets or expand existing ones.

6) Building Customer's relationship :-

Marketing fosters long-term relationships with customers through effective communication, customer engagement & satisfaction initiatives, leading to repeat purchase, brand loyal & positive word of mouth.

7) Gaining Competitive Advantage :-

Marketing helps businesses stay competitive by analyzing competitors, identifying market trends & developing strategies to differentiate their offerings & stay ahead in the market.

Q. 5
Ans

Explain product development stage.

Product development typically involves several stages starting from ideation to market launch. These stages often include concept, development, market research, design, prototyping, testing & commercialization. Each stage is crucial for refining the product, ensuring it meets customer needs & is viable for market.

1) Idea Generation:-

This is where ideas for new products or improvements to existing ones are brainstormed. It could come from customer feedback, market, or internal innovation efforts.

2) Concept development & Screening:-

Once ideas are generated, they are developed into concepts. These concepts are then screened & evaluated based on factors like feasibility, market potential & alignment with business goals.

3) Market Research &

Market Research is conducted to understand customer needs, preferences & the competitive landscape. This helps in refining the product concept & identifying target market.

4) Design & Development:-

In this stage the chosen concept is further developed into a detailed design. Engineers, designers, & other specialists work together to create prototypes & refine the product's features & functionality.

5) Testing & validation:-

Prototypes are tested rigorously to ensure they meet quality standards & perform as expected. This stage may involve alpha & beta testing, user feedback sessions & iterative improvements.

6) Production & manufacturing:-

Once the product is validated it moves into production. This involves setting up manufacturing processes, sourcing materials & producing the final product at scale.

7) Marketing & Launch:-

Marketing strategies are developed to create awareness & generate interest in the product. The product is then launched into the market.

8) Post-launch evaluation:-

After the product is launched, its performance is monitored & feedback is collected from customers. This helps in identifying areas for improvement & informs future product development efforts.

Guest Lecture Report.

Date: 20-01-2024

Mode: Online Zoom Platform

A guest lecture was scheduled on January 19, 2024, at 10:30 A.M. in association with NSDL and Poornatha the session heading "Market Ka Ekalavya". Market ka Eklavya is a financial literacy course for students by NSDL (National Securities Depository Limited), MADE – US (Michigan Academy for Developing Entrepreneurs) and Poornatha which focuses on the basics of investing and the capital market. It provided a comprehensive learning experience for management students that helped them to stay updated in the complex financial markets.

The following were the main ideas that were covered:

- Basics of capital markets
- Primary Markets and IPOs
- Secondary Market functions
- Investment related risks
- Strategies of investment

Under this session our 50 students and teaching staff were present and were benefited.

Below attached pictures are the glimpse of the guest session.

Market Ka Eklavya

AN INVESTOR AWARENESS PROGRAM

India's accelerated economic growth rate has enhanced public participation in the capital markets. Greater participation of retail investors enables creation and accumulation of wealth for the public at large, thereby facilitating sustained economic growth.

Minutes of Meeting

The chairman Dr. Sanoj Kumar occupied the chair and welcomed the members for staff Meeting for the month January 2023. The following business was transacted in the meeting:-

Agenda:1 Confirmation and Review of Minutes of Staff meeting held on 05/08/2023.

Resolution:

Thorough discussion was made, review is taken and Minutes of staff meeting held on 05/08/2023 unanimously approved.

Agenda:2 Action taken report of staff Meeting held on 05/08/2023.

Sr. No.	Resolution in the Meeting	Action Taken for Implementation & Outcomes
1	Discussion on Independent Day Celebration.	A committee was formed to plan the Independence Day celebration. The committee held a meeting to gather ideas from the community on how to celebrate the day. They organized a flag-hoisting ceremony, cultural programs, and a speech by a prominent community member. The event was well-attended and received positive feedback from the community. The committee plans to continue to celebrate Independence Day in this manner each year.
2	Discussion on 2 nd Semester Examination.	A meeting was held with the faculty members to discuss the implementation of the 2nd semester examination. Different scenarios were discussed and evaluated. It was

		discussed and evaluated. It was decided that the examination would be conducted offline.
3.	Discussion on First Year Freshers Party.	A meeting was held among the student council, faculty advisors, and interested freshmen to plan and implement a successful First Year Freshers Party. The agenda included brainstorming ideas for the theme, venue, and activities, as well as discussing budget allocations and necessary permissions. A committee was formed to oversee the execution of the plan and ensure that all necessary steps were taken to make the event a safe and enjoyable experience for all attendees. A schedule was set for regular meetings to review progress and make any necessary adjustments.

Agenda:3 Discussion on Teachers Day Celebration.

Resolution:

During the meeting, the organizers discussed the plans for the upcoming Teachers Day celebration. It was decided that the celebration would be held in the institution auditorium on September 5th and would include various performances and activities by students to honor the teachers. It was agreed that the students would take the lead in organizing the celebration, with guidance from the teachers. Overall, the discussion was productive and everyone was enthusiastic about making the day special for the teachers.

Agenda:4 Discussion on Krishna Jayanthi Holiday, Anant Chathurdashi & Eid Holiday declaration.

Resolution:

A discussion was held regarding the upcoming Krishna Jayanthi Holiday, Anant Chathurdashi & Eid festival holiday. It was decided that the institution will grant one-day holiday for the festival. The Admin staff was asked to send out an Circular to all staff members regarding the holiday schedule. Overall, it was a productive discussion and the employees are now looking forward to celebrating the festival.

Agenda:5 Ganesh Chaturthi Break planning.

Resolution:

Mumbai University has declared a public holiday from 19th September, 2023 to 25th September, 2023, in observance of the Hindu festival of Ganesh Chaturthi. During the meeting, it was discussed the possibility of declaring a holiday for students and staff. It was decided that the college would close from 19th September, 2023 to 25th September, 2023. The decision was welcomed by all members in attendance. Appropriate communication channels will be used to inform students and staff about the holiday declaration.
